**[RUSH] MESSAGE:** _____

On Page 40 of the specification submitted on 4-10-01 there is a
reference on Line 5 to a Figure 23. Figure 23 does not exist on the
drawing sheets of this Application. Should it read Figure 13?

Please verify

Thank You

**[XRUSH] RESPONSE:** _____

**INITIALS:**

NOTE: This form will be included as part of the official USPTO record, with the Response
document coded as XRUSH.
REV 10/04

of the image data 620 is executed.

The charge process herein, for example, is to be the preparation process using the charge table as shown in FIG. 13.

In the charge table of FIG. 13, are stored [User name] of the user carrying out the printing and [Charge status] illustrating the charge being billed to the user. In [Charge status], is stored "compensation being set to printing compensation information", for example, money converted into currency such as 13.75 dollars. In addition, in "compensation being set to printing compensation information" is to be stored the value of points by which the print processing is counted, and the points may be converted into money in a currency conversion unit (not shown) responding to the currency unit of each region.

Also, the charge table may include the volume number of the printing, the paper sizes for the printing and so forth.

Also, the corresponding charge process is executed so that the charge is billed to the user that now is printing, but the process is not limited thereto, and may be configured so that the charge to each department is possible by preserving the department code and so forth.

In addition, the printing log being prepared as described above is sent to a compensation information
